EXPERIENCE

Private Online Project

📅 **2021 Feb - Present**

I have worked on below projects:

1- I've Used open-source E-commerce Bagisto platform and added some modules in it. Some of the modifications are subdomain has marketplace of participants, participant also have branch shops. I've added my package of payment integration for Stripe & Paypal. The project uses Laravel as backend code whereas Vue code was also added or modified in front-end.

2- Transport System Project: After placing order transport application accept, pickup and deliver order.

3- Settlement Project: After completing order, shops orders are settled by transferring to their virtual bank account.

4- Media Site: A user can upload video , images on this site. These media content are promotions video and images related to shops

5- CRM Project: In this project manager, supervisor and operators roles are used. It has following functionalities:
Assigning Project to supervisor, Assigning Task to operator, Scheduling Event to users, Displaying on Calendar deadlines. This project was built using Laravel voyager.

PETROTECH-CLOVER PVT. LTD

📅 **2017- 2021 February**

Worked with Laravel framework to build various business application. The application facilitate below processes:

1- Create Service Request

2- Assign Work Order
