PROFILE

Senior Full Stack Developer with 8+ years of experience building scalable web applications using Laravel, Vue.js, and React, delivering high-quality backend architectures and modern front-end solutions. Skilled in API development, clean code practices, and mentoring teams, with a strong track record of solving complex engineering problems. Currently enhancing expertise in Spring Boot microservices, Docker, and CI/CD pipelines through self-driven projects, demonstrating adaptability and a commitment to continuous learning.

EXPERIENCE

FREELANCER

Private Job, Pakistan

Feb 2021 to Present

I have worked on following projects:

1- Patient Management System: Developing a comprehensive Patient Management System utilizing Laravel Filament. This system is designed to adhere to the industry-standard HL7 FHIR protocol, ensuring seamless integration and data exchange within healthcare environments.

Key Responsibilities:

- Designed and implemented standard forms compliant with HL7 FHIR protocols, facilitating accurate and efficient patient data management.
- Integrated advanced AI algorithms to assist in diagnosing patients, enhancing the system's diagnostic capabilities.
- Developed and utilized AI-driven transcription technology to accurately convert audio inputs into textual data, improving accessibility and record-keeping.

2- AI Integration:

- AI Chatbot Development: Developed an AI Chatbot with Flowise, facilitating seamless conversations and providing accurate responses based on the uploaded documents in its knowledge base.
- RAG (Retrieve and Generate): Utilized the RAG model, where the system retrieves relevant information from the uploaded documents and generates coherent responses, enhancing the bot's accuracy and relevance.
- Utilized ChatGPT Whisper Model to perform audio transcription in the project. This integration enabled accurate and efficient conversion of spoken content into written text, significantly enhancing the project's data processing capabilities.

EXPERIENCE

Freelancer Continue..

- 3- E-commerce Project: I've used open-source E-commerce Bagisto platform and added some modules in it. Some of the modifications are subdomain has marketplace of participants, participant also have branch shops. I've added my package of payment integration for Stripe & PayPal. The project uses Laravel as backend code whereas Vue code was also added or modified in front-end.
- 4- Transport System Project: After placing order transport application accept, pickup and deliver order.
- 5- Settlement Project: After completing order, shops orders are settled by transferring to their virtual bank account.
- 6- Media Site: A user can upload video, images on this site. These media content are promotions video and images related to shops
- 7- CRM Project: In this project manager, supervisor and operators' roles are used. It follow standard workflow assignment.
- 8- Leveraged ChatGPT to generate high-quality, engaging blog content, optimizing the writing process and improving reader engagement.
- 9- Integrated the Gemini API to produce custom images, enriching the visual appeal and user experience of my projects.

Technologies Used:

PHP, JavaScript/TypeScript, Laravel, Node.js, Vue.js, REST APIs, Google Map API, PayPal API, Stripe API, React.js, Flowise AI, Bootstrap, Tailwind, Livewire, Laravel Voyager, MySQL, Postgres

Software Developer

Mar 2017 to Feb 2021

PETROTECH-CLOVER PVT. LTD, Pakistan

Worked with Laravel framework to build various business application. The application facilitates below processes:

- 1- Create Service Request
- 2- Assign Work Order
- 3- Manage Inventory
- 4- Technician Expenses
- 5- SMS Email on Assignment
- 6- Google Map is used to display vehicle technician. Distance between various sites is calculated for efficient allocation of resources. Additionally worked on other project and made contribution by implementing the required changes in the package for the project.
- 7- Used node.js
- 8- Used Vue.js within Laravel
- 9- Experience of working in Ubuntu OS.
- 10- Usage of MySQL database

EXPERIENCE

Software Developer

Media And Us, Pakistan

Nov 2014 to Apr 2016

Worked as a software engineer. I mainly worked on their web application. I used below technology during work:

- MVC framework: CakePHP
- Front-end development using HTML, CSS, jQuery, Bootstrap
- Used API of Facebook, YouTube, Google+, Tumblr, Spotify, Vimeo, Vine, Twitter
- Used multiple plugins for projects such as jQuery camera plugin xarg, WYSIWYG editor ELRTE, Word 2 html plugin mammoth
- Configuring Apache and database on Linux, Amazon Web Services CentOS

Senior Data Processing Engineer

Etlize Gfk Pakistan. (Night Shift)

Jan 2011 till June 2014

I was responsible for identifying the latest product models for various brands of computer items across different countries. Additionally, I meticulously entered these details into our catalog to ensure accuracy and up-to-date information.
